GLIGHT

# emergency lighting

GSYSTEMS is a manufacturer of customized exit sign and emergency luminaires!

Livesafers – made in Zwickau!

Complete solutions from GSYSTEMS  
made in GERMANY

[www.gsystems.de/GCONTROL](http://www.gsystems.de/GCONTROL)

GCONTROL

# device technology for emergency lighting

e.g. LPS/CPS systems for centralized supply, single battery monitoring systems

Now new: LPS and CPS systems with lithium technology

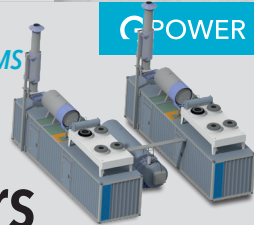

[www.gsystems.de/GSYSTEMS](http://www.gsystems.de/GSYSTEMS)

GPOWER

# diesel generators

for long bridging times in modular, flexibly manufactured containers, up to 2 MW output

Optionally with integrated ups system!

[gsystems.de/GSYSTEMS](http://gsystems.de/GSYSTEMS)

GPOWER

# rectifiers

Supply voltage 24 to 220 V DC for controlling and monitoring production processes, transformers and circuit breakers

100 % power even with controller failure!

GPOWER

[www.gsystems.de/GSYSTEMS](http://www.gsystems.de/GSYSTEMS)

# UPS-, emergency power- & battery-powered supply systems for hospitals

for the supply of critical loads in public or industrial buildings and hospitals

ups-systems: 600 VA – 4,8 MVA  
emergency power supply systems:  
1 kVA – 600 kVA according to DIN EN 50171  
battery-powered supply systems for hospitals:  
AC supply: 1 kVA – 80 kVA / DC supply: 100 W – 5 kW

Highest energy efficiency!

[gsystems.de/GPOWER](http://gsystems.de/GPOWER)

GPOWER

# energy storage

efficient use of generated energy from photovoltaic systems or combined heat and power plants

Contributes to grid stability and promotes the integration of renewable energy.

Continuous energy supply!

GBATT

[www.gsystems.de/GBATT](http://www.gsystems.de/GBATT)

# batteries

lithium batteries, nickel-cadmium batteries, lead batteries

High-tech batteries for every application!

# services at a glance

## SALES AND PROJECT PLANNING

[www.gsystems.de/projectplanning](http://www.gsystems.de/projectplanning)

### Distribution

- throughout Germany
- external sales partners in Austria, Luxembourg, Switzerland, Sweden, Norway

GSYSTEMS sales representatives can arrange suitable solutions for your individual projects. Professional expertise, a keen instinct for important details and reliability in terms of design and architecture promise innovative results.

Arrange an appointment with a sales professional on site!

### Planning and project planning of

- emergency luminary systems
- emergency power supply systems
- rectifier systems
- ups systems
- battery-powered supply systems for hospitals
- diesel generators
- energy storage systems

In collaboration with our technical support, required planning and project planning arise for your desired applications. All needed tasks and concepts will be examined and confronted here, in order to determine the safest and most profitable solution.

## DEVELOPMENT

[www.gsystems.de/development](http://www.gsystems.de/development)

- general and emergency luminaries
- supply and control units
- LED-lamps

A team of developers and designers is constantly working on the development of products in order to achieve a high level of innovation. Due to continuous changes in the field of materials and electrical engineering, GSYSTEMS is focusing more and more on the sustainability of its products.

## PRODUCTION

[www.gsystems.de/manufacturing](http://www.gsystems.de/manufacturing)

- emergency luminaries
- exit sign luminaires
- tunnel luminaries
- special luminaires

Experienced processes in a consistent team are the base for high reliability of GSYSTEMS, therefore one particular attention focuses on adherence to delivery dates. All staff members contribute a crucial part of our product quality on a daily bases – made in Germany!

This quality as manufacturer and supplier is officially verified and accepted by TÜV (Technical Inspection Association) with its DIN EN ISO 9001-Certification.

## SERVICE

[www.gsystems.de/services](http://www.gsystems.de/services)

- installation, service and repairing, refurbishment, removal of emergency power systems

Our service technicians are the warrantors for these performances with extensive measurement technique. They are in possession of longtime experience and contact persons for all questions about battery technology and emergency-power supply. GSYSTEMS coordinates and performs by law required services and ensures the proper functionality of its systems.

24-hour service for systems with maintenance contracts

Put your trust in the decades of expertise of GSYSTEMS GmbH!

We look forward to your enquiry!
